

## DAY 5

### Task 1

Create 3 separate component:

header.jsx

```
function header(){
  return (
    <div class = "header">
      <h1>This is header component</h1>
    </div>
  );
}

export default header;
```

content.jsx

```
function content(){
  return (
    <div class = "content">
      <h1>This is content component</h1>
    </div>
  );
}

export default content;
```

footer.jsx

```
function footer(){
  return (
    <div class = "footer">
      <h1>This is footer component</h1>
    </div>
  );
}

export default footer;
```
